## Dynamic Forces Rotational Dynamics - Part 2

By Richard Fiore  
(Licentiate, (LAB, LAR, T) Imperial Society of Teachers of Dancing)

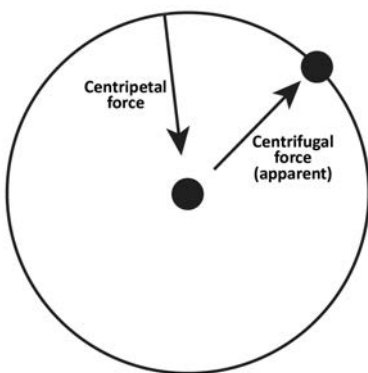

Dynamic forces of motion are an aspect of ballroom dancing that always needs to be taken into account. The concept of momentum as it relates to partners moving together along the dance floor in a straight-line path was discussed in the last issue. Momentum was defined as the product of mass times speed ( $mv$ ) in the direction of travel. This article will highlight the dynamic forces that are generated as a result of rotational movements.

Visualize an ice skater spinning continuously about one point on the ice. The skater experiences various rotational forces, also known as angular forces. These kinetic forces are inherent in all rotational movements. Ballroom dancers experience the same forces while dancing any curved or turning movements. Managing the natural forces that result from this type of motion relies on a kinesthetic sensory skill that allows one to know where their body is spatially at any given instant. Refining these skills enables dancers to execute rotational movements with greater spatial exactness on the dance floor.

Rotational forces are perhaps the most challenging to manage. They are dynamic and can therefore change instantaneously in magnitude and direction. These movements generate a force known as centrifugal force that pushes an object outward and away from the center of rotation. Likewise, there is an opposite force generated known as centripetal force that pulls an object in toward the center of rotation. These forces are equal and opposite and proportional to the rotational speed and mass of an object traveling around a curved path. This motion results in rotational or angular momentum. To illustrate this point, let's visualize a spinning bicycle wheel. Locate the spot closest to the center of the wheel and then extend an imaginary line to the rim of the wheel. From this we see that the center of the wheel is the center of rotation, also known as the axis of rotation. The rim of the wheel is the point furthest from the center. An object that is situated furthest from the center, at the rim in this example, has to travel faster and hence will cover more distance as compared to an object that is closest to the center of the wheel. This analogy can be directly applied to describe the inside and outside of a turn. In the context of ballroom dancing, one partner has to move faster and over a greater distance while on the outside of the turn, i.e., furthest point from the center. At the same time the other partner who is on the inside of the same turn covers less distance and moves at a slower speed. From this, we can begin to see the significance of how two dancers have to constantly adjust to varying degrees of angular momentum exerted on their bodies as a direct result of where they are positioned in the turn at any given instant.

Viennese waltz is a unique smooth ballroom dance that differs from slow waltz, in that partners travel down the line of dance while constantly orbiting around each other. Each partner makes a continuous transition between the outside

The Haymakers

and inside of each turn respectively. Both partners have to stay in balance with each other throughout this travel and turning process. They will both experience variable amounts of angular momentum throughout the dance. The amounts of turn and speed in each of the turns change constantly and independently for both partners. One partner has a longer circular path as the other has a shorter path and then vice versa. For example, in the first half of the Viennese waltz left turn, the leader is on the outside of the turn. This puts him farther from the axis of rotation where he will experience the outer directed centrifugal force with greater rotational momentum in this movement. During the second half of the turn, he will be on the inside of the turn where he will experience the inner-directed centripetal force. The follower experiences the opposite throughout the dance.

Rotational forces are always present as partners dance turning movements. Cultivating kinesthetic awareness of these kinetic forces of motion takes time to develop and refine. It is one of the finer aspects of dancing that will afford a greater degree of precision and stability while dancing turning movements.

### Ballroom Dancing at Adelphi University

Professional  
Studio with wood  
floor & mirrors!

Refine your skills in the most  
popular ballroom dances!  
Best practice syllabus  
based techniques.

Join us at Adelphi University Garden City, NY Campus  
for an Amazing 11 week Dance Class

**Class dates to be announced!**

**Description:** This class offers an opportunity to gain experience in social / ballroom dancing. It is an excellent choice for those looking to develop fundamental dance skills as well as building on previous experience. The instructor will break down all dance figures and combine them to form amalgamated routines. Best practice syllabus-based techniques in timing, feet positions, alignment, footwork, and lead and follow will be demonstrated. This class is suitable for first time dancers as well as those with previous experience. It is designed to build confidence and enhance social enjoyment on the dance floor. Social dancing gives you a more positive outlook on life!

Enrollment with a partner is recommended; however, singles are welcome. Participants should wear comfortable clothes and leather bottom shoes or dance shoes. Sneakers or rubber bottom shoes are not recommended.

**Candidate Dances:** Foxtrot, Rumba, Waltz, Cha Cha, Swing, Salsa/Mambo, Bachata, Tango & Meringue

**Instructor:** Richard Fiore – Dual Licentiate, US Imperial Society of Teachers of Dancing

**Location:** Adelphi University, One South Ave., Garden City, NY 11530 - Woodruff Hall Dance Studio

**To Register:** \$125/person for general admission. **Registration with a partner is recommended.** Call Noreen DeNicola at (516) 877-4260 or email ndenicola@adelphi.edu

## The Sting of Tango

By Michael Ditkoff

*Michael Ditkoff has taken ten years of private ballroom, latin, swing and hustle lessons; eight years of private Argentine Tango, Waltz and Milonga lessons; three years of Embodied Yoga to improve his frame, and six months of Alexander Technique to improve his posture. He was also a dance host on three cruise ships.*

Email Michael at: [tangomaniac@optimum.net](mailto:tangomaniac@optimum.net)

I had a very deep, intense conversation with a tango follower on a topic rarely discussed by teachers and on dance bulletin boards. Even though Argentine Tango offers warmth and passion, it can only occur after you've found a compatible partner. Finding a compatible partner isn't as easy as it sounds. Even using cabeceo (May 2018 issue) in a well-lit milonga (October 2021 issue) doesn't guarantee a tanda. Argentine Tango is very personal and personal reasons are a big factor in a leader's decision who to invite and a follower's decision to accept it.

The follower went to a milonga and didn't get any invitations and thought she did something wrong. Her only mistake was going to that particular milonga.

She went to another milonga which was almost pitch black. She didn't get any invitations except one where the leader asked how

long she had been dancing. When she answered, "four years," the leader replied, "Oh. You're a beginner." (That is about the rudest thing a leader can say.) I've heard of leaders with colossal egos making outrageous statements, but this one is over the top.

Every milonga has its own "personality." At cliquish milongas, you'll dance only if you're inside the clique. I went to a tango marathon which had a tough crowd. It was difficult to get a tanda. The promoter interrupted cortinas numerous times and asked dancers "to be friendly." It took a while before understanding the real message. I remember attending a milonga where attendees sat at tables. I randomly selected a non-reserved table and was ignored for most of the night. It was if I was invisible. On another occasion, I sat at a non-reserved table and a group said I was sitting at their table even though there wasn't a reserved sign.

It's aggravating to watch your desired partner dance with somebody else. But not just somebody else. It's usually a person you consider an inferior dancer. But there's nothing you can do about it - - and you'll never find out the reason.

Unlike other dances which are "one and out," Argentine Tango has the aura of a tanda of four tangos and usually three consecutive waltzes and milongas.

Every invitation is a gamble. Dancing AT is like riding a roller coaster. You can feel the adrenalin rush of pleasure. You can also feel the sting of rejection.
